

Proven Diesel Fuel System Solutions

At Exergy Engineering, we understand diesel fuel systems and their impact on engine performance and emissions. We have extensive experience with all types of modern electronic diesel fuel systems.

Our associates have been working with premiere diesel engine manufacturers for over 12 years; designing, building, and testing the fuel systems of today, and those of tomorrow.

With Exergy, you will discover creative, yet cost-effective solutions to your complex technical and commercial issues.

We specialize in:

- Component Design
- Layout/Packaging
- Cost Reduction
- Consulting
- Reverse Engineering
- Reman Operations
- Instrumentation
- High Pressure Pulsation
- Competitive Analysis
- System Application
- Testing & Test Equipment
