

Innovative Ideas... **Proven Diesel System Results**

Design Development Testing Analysis Test Equipment

We are Exergy Engineering. A company that understands diesel fuel systems and their impact on engine performance and emissions. Our associates have been at the forefront of diesel fuel system research and development for over a decade.

With tight budgets, critical timelines, and the lack of experienced fuel system personnel, companies in the diesel industry are finding Exergy Engineering to be a valued partner whom they can trust to deliver creative, yet cost-effective solutions to their organization.
